

## Fire Safety Officer Training

*Delivered by Allens Training PTY Ltd - RTO 90909 through PRM as a 3rd party provider.  
Nationally recognised training.*

PRM's Fire Safety Officer Training course has been developed for individuals who wish to work, or have been appointed, in the role of Fire Safety Officer (FSO).

Students will be made familiar with all aspects of building fire safety on day-to-day matters and during facility emergencies.

This two-day course has been developed to cover a broad range of emergencies and facilities as considered in Australian Standard 3745 and Australian Standard 4083.

Where this course is being delivered within the NSW Health sector, it is done in accordance with the NSW Health's Policy Directive for Fire Safety in Health Care Facilities (PD2010\_024).

This will suit employees with limited or no fire safety experience and who are fulfilling a secondary appointment role. The FSO role is appropriate for smaller facilities or at a department level in a large facility.

At PRM we are proud to employ experts trainers who draw on their lived experiences to deliver educational courses that engage all participants.

As one of Australia's leading emergency management consulting firms PRM hire operational emergency responders and industry specialists, and deliver bespoke training and consulting solutions.

### Topics

- Understand the role and responsibilities of an FSO;
- Understand legislation relating to fire safety;
- Identify fire safety installations and equipment in a building;
