

PRM Training | Provide Advanced Resuscitation and Oxygen Therapy

Delivered by Allens Training PTY Ltd - RTO 90909 through PRM as a 3rd party provider.

This Advanced Resuscitation course is delivered in line with the Australian Resuscitation Council guidelines and first aid code of practice and applies to those who may be required to provide first aid, CPR and oxygen in a range of complex situations, including community and workplace settings.

Simulated real-life situations will be used to develop the skills and knowledge for using and maintaining specialised equipment for the provision of first aid, resuscitation, and oxygen therapy.

Instruction on first aid and CPR will be provided, as well as treatments specific to advanced conditions, such as inserting an appropriate basic airway adjunct, using tourniquets and haemostatic dressings for life-threatening bleeding, and administering oxygen safely at the correct flow rate.

The course covers recording casualty condition, conveying incident details, completing workplace incident documentation, and debriefing to recognise areas for improvement, psychological impacts, and seeking help as required.

Performance tasks and practical scenarios:

- Perform CPR on an adult (incl. the use of bag-valve-masks, oxygen equipment, an AED and placing the casualty into the recovery position)
- Perform CPR on an infant
- Manage a casualty with a life-threatening bleed and provide oxygen
- Complete an incident report
- Maintain resuscitation equipment

Class Size / 12 maximum

Duration / 6 hours face to face

Style / In class lecture and practical hands-on skill development, with demonstrations and discussions, including slides and video. This is a skills-based course with significant practical learning requiring active participation of the students. Individuals undertaking this course will be expected to complete both written and practical assessment tasks.
